

WHO ARE WE?

THE DEPARTMENT OF ACCOUNTING

We have been established for 50 years. With over 5,000 alumni, our graduates are widely distributed in **accounting and financial fields**. The alumni association is strong and connecting, making significant contributions to society. We've got excellent faculty members, including both academic and practical instructors.

We implement the school policy of "**Employment upon Graduation**" which enables students to make a smooth transition into the workplace. We promote a semester-long **internship program**, which would encourage students to participate in internships at international enterprises during their last semester of senior year. This initiative aims to accumulate workplace experience in advance, providing opportunities to be retained by the participating companies. In the past three years, **over 50% of the students got their job through the internship.**
